Extended Grid System — Complete

10	Original formats (locked)
29	New calculated formats
30	Inherited formats
69	Total formats

Cluster distribution

A	Standard print (A4, A3, envelopes) Body 12pt · LH 19px · Col gutter 19px · Row gutter 19px
B	Medium print (A5, A6, menus) Body 10pt · LH 16px · Col gutter 10px · Row gutter 16px
C	Small cards (@2x in Figma) Body 7.5pt · LH 12px · Col gutter 6px · Row gutter 12px
D	Digital social (Facebook, LinkedIn, Twitter) Body 16pt · LH 24px · Col gutter 16px · Row gutter 24px
E	Digital tall (Story, TikTok) — already built Body 32pt · LH 38px · Col gutter 32px · Row gutter 38px
F	Presentation + large digital (YouTube, Pitch) Body 24pt · LH 32px · Col gutter 24px · Row gutter 32px
G	Digital email (600px width) Body 10pt · LH 16px · Col gutter 10px · Row gutter 16px

The formula (immutable)

1. Body size → line height (size × 1.60, round to whole px)
2. Field height = N × line height (whole multiples only)
3. Row gutter = 1 × line height exactly
4. Column gutter = body size (matched to row gutter where equal)
5. Margins = derived — (frame – fields – gutters) ÷ 2
6. Verify: top + (rows × field) + ((rows–1) × gutter) + bottom = height
7. Verify: margin + (cols × col_width) + ((cols–1) × gutter) + margin = width
